The Botanic Garden of Smith College comprises a campus-wide arboretum, specialty gardens, and a conservatory. The tender collection is housed in a complex of glasshouses, some dating to the late 19th century and designed by Lord & Burnham. The 125-acre campus supports hardy species, both native and exotic. All seed/spores were collected in 2018 except those reoffered from 2017. All seed is stored at 40°F; moist-stored seed will be shipped in moist sphagnum moss.

To learn more about the Botanic Garden of Smith College see our web site:
<http://www.smith.edu/garden>.

NOTE: We support the Convention on Biological Diversity. The seeds or spores offered are distributed for the use of the common good in the areas of research and development of public gardens and plant collections. They should not be used for commercial profit. If publications result from the use of this material, we expect acknowledgement as the source of the material and an unsolicited reprint of any publication.
