

The Botanic Garden | of Smith College

Index Seminum 2026

About:

The Botanic Garden of Smith College spans 127 acres and includes the 12 000 square foot Lyman Conservatory, Church Gallery, arboretum and many outdoor gardens. The garden was founded by Smith College's first president, Laenus Clarke Seelye, so that the entire campus could be of scientific, as well as aesthetic, value. Today it continues to meet those goals.

Mission:

The Botanic Garden of Smith College fosters environmental and social justice through teaching and learning about plants, people and place.

We do this by:

- Curating plant collections that share stories about plant and human diversity.
- Training students to be informed thought leaders and change agents.
- Helping teachers develop integrative, learner-centered experiences.
- Welcoming visitors to explore, learn and contribute their knowledge.
- Cultivating spaces and landscapes that stimulate thought, creativity, collaboration and well-being.

Index Seminar:

Seeds in our *index seminar* are collected by botanic garden staff, students, and colleagues. Special thanks to the landowners that permit seed collecting and to the student workers who clean the seeds. Further provenance data is available upon request. Phytosanitary certificates are provided as required.

**Seeds must be ordered through our web catalog: <https://smith.indexseminum.org/>
Each order must include a minimum of 3 numbers, and is limited to 15 numbers
Orders can be placed until 2025-05-22**
